APPLIED CATALYSIS A: GENERAL

Author Index

Albert Vannice, M., see Mao, C.-F. 61
Algarra, F., Corma, A., García, H. and Primo, J.
Acid zeolites as catalysts in organic reactions. Friedel–Crafts reaction of 2-alkylfurans with 3-substituted allylic alcohols 125
Anthony, R.G., see Udomsak, S. 111
Berger, D., see Yitzhaki, D. 99
Berger, F., see Vodnár, J. 33
Bhat, Y.S., Das, J. and Halgeri, A.B.
Effect of extrusion and silylation of ZSM-5 on *para* selectivity of diethylbenzenes 161
Burch, R. and Loader, P.K.
Investigation of methane oxidation on Pt/Al_2O_3 catalysts under transient reaction conditions 169
Corma, A., see Algarra, F. 125
Das, J., see Bhat, Y.S. 161
Du, B.-S., see Wang, W.-X. 5
Fejes, P., see Vodnár, J. 33
García, H., see Algarra, F. 125
Guisnet, M., see Moljord, K. 21
Hadden, R.A., Lambert, P.J. and Ranson, C.
Relationship between the copper surface area and the activity of $CuO/ZnO/Al_2O_3$ water–gas shift catalysts L1
Halgeri, A.B., see Bhat, Y.S. 161
Herskowitz, M., see Yitzhaki, D. 99
Knözinger, H., see Miciukiewicz, J. 151
Lambert, P.J., see Hadden, R.A. L1
Landau, M.V., see Yitzhaki, D. 99
Levin-Elad, M., see Neumann, R. 85
Li, F., see Wang, W.-X. 5
Loader, P.K., see Burch, R. 169
Lott, S.E., see Udomsak, S. 111
Magnoux, P., see Moljord, K. 21
Mang, T., see Miciukiewicz, J. 151
Mao, C.-F. and Vannice, M.A.
High surface area α-aluminas II. Adsorption of oxygen, ethylene, carbon dioxide and carbon monoxide on silver dispersed on HSA α-alumina 41
Mao, C.-F. and Albert Vannice, M.
High surface area α-aluminas III. Oxidation of ethylene, ethylene oxide, and acetaldehyde over silver dispersed on high surface area α-alumina 61
Miciukiewicz, J., Mang, T. and Knözinger, H.
Raman spectroscopy characterization of molybdena supported on titania–zirconia mixed oxide 151
Moljord, K., Magnoux, P. and Guisnet, M.
Coking, aging and regeneration of zeolites XV. Influence of the composition of HY zeolites on the mode of formation of coke from propene at 450°C 21
Neumann, R. and Levin-Elad, M.
Vanadium silicate xerogels in hydrogen peroxide catalyzed oxidations 85
Okado, H., see Yamamura, M. 135
Otsuka, K., see Yamamura, M. 135
Primo, J., see Algarra, F. 125
Ranson, C., see Hadden, R.A. L1
Tsuzuki, N., see Yamamura, M. 135
Udomsak, S., Anthony, R.G. and Lott, S.E.
Silicon–amine intercalated titanates as novel supports for hydrotreating catalyst 111
Vannice, M.A., see Mao, C.-F. 41
Varga, K., see Vodnár, J. 33
Vodnár, J., Fejes, P., Varga, K. and Berger, F.
Decomposition of organic hydroperoxides on cation exchangers Kinetic pathway of *p-tert*-butylcumene hydroperoxide decomposition 33
Wakatsuki, T., see Yamamura, M. 135
Wang, D.-M., see Wang, W.-X. 5
Wang, W.-X., Zhao, H.-Q., Du, B.-S., Wen, J.-M., Li, F. and Wang, D.-M.
Activity and reduction behavior of fused iron catalysts containing cobalt for ammonia synthesis: a structure study 5
Wen, J.-M., see Wang, W.-X. 5
Yamamura, M., Okado, H., Tsuzuki, N., Wakatsuki, T. and Otsuka, K.
Oxidative coupling of methane over ternary metal oxide catalysts consisting of Groups I, III and V elements in the Periodic Table 135
Yitzhaki, D., Landau, M.V., Berger, D. and Herskowitz, M.
Deep desulfurization of heavy atmospheric gas oil with Co–Mo–Al catalysts Effect of sulfur adsorption 99
Zhao, H.-Q., see Wang, W.-X. 5

Applied Catalysis A: General 122 (1995) 193–195

APPLIED CATALYSIS A: GENERAL

Subject Index

Acetaldehyde oxidation
High surface area α-aluminas III. Oxidation of ethylene, ethylene oxide, and acetaldehyde over silver dispersed on high surface area α-alumina 61
Acidity
Coking, aging and regeneration of zeolites XV. Influence of the composition of HY zeolites on the mode of formation of coke from propene at 450°C 21
Decomposition of organic hydroperoxides on cation exchangers Kinetic pathway of *p-tert*-butylcumene hydroperoxide decomposition 33
Adsorption
High surface area α-aluminas II. Adsorption of oxygen, ethylene, carbon dioxide and carbon monoxide on silver dispersed on HSA α-alumina 41
Deep desulfurization of heavy atmospheric gas oil with Co–Mo–Al catalysts Effect of sulfur adsorption 99
Alkene epoxidation
Vanadium silicate xerogels in hydrogen peroxide catalyzed oxidations 85
Alkylation
Acid zeolites as catalysts in organic reactions. Friedel–Crafts reaction of 2-alkylfurans with 3-substituted allylic alcohols 125
Alumina
High surface area α-aluminas III. Oxidation of ethylene, ethylene oxide, and acetaldehyde over silver dispersed on high surface area α-alumina 61
Ammonia synthesis
Activity and reduction behavior of fused iron catalysts containing cobalt for ammonia synthesis: a structure study 5
Ball-shape catalyst
Activity and reduction behavior of fused iron catalysts containing cobalt for ammonia synthesis: a structure study 5
Carbon dioxide
High surface area α-aluminas II. Adsorption of oxygen, ethylene, carbon dioxide and carbon monoxide on silver dispersed on HSA α-alumina 41
Carbon monoxide
High surface area α-aluminas II. Adsorption of oxygen, ethylene, carbon dioxide and carbon monoxide on silver dispersed on HSA α-alumina 41
Catalyst characterization (BET/XRD/XPS)
Oxidative coupling of methane over ternary metal oxide catalysts consisting of Groups I, III and V elements in the Periodic Table 135
Catalyst preparation (sol-gel)
Vanadium silicate xerogels in hydrogen peroxide catalyzed oxidations 85
Cation exchangers
Decomposition of organic hydroperoxides on cation exchangers Kinetic pathway of *p-tert*-butylcumene hydroperoxide decomposition 33
Coke
Coking, aging and regeneration of zeolites XV. Influence of the composition of HY zeolites on the mode of formation of coke from propene at 450°C 21
Copper
Relationship between the copper surface area and the activity of $CuO/ZnO/Al_2O_3$ water–gas shift catalysts L1
Diethylbenzenes
Effect of extrusion and silylation of ZSM-5 on *para* selectivity of diethylbenzenes 161
Ethylene
High surface area α-aluminas II. Adsorption of oxygen, ethylene, carbon dioxide and carbon monoxide on silver dispersed on HSA α-alumina 41
Ethylene oxidation
High surface area α-aluminas III. Oxidation of ethylene, ethylene oxide, and acetaldehyde over silver dispersed on high surface area α-alumina 61
Ethylene oxide isomerization
High surface area α-aluminas III. Oxidation of ethylene, ethylene oxide, and acetaldehyde over

silver dispersed on high surface area α-alumina 61
Ethylene oxide oxidation
High surface area α-aluminas III. Oxidation of ethylene, ethylene oxide, and acetaldehyde over silver dispersed on high surface area α-alumina 61
Extrusion
Effect of extrusion and silylation of ZSM-5 on *para* selectivity of diethylbenzenes 161
Friedel–Crafts reaction
Acid zeolites as catalysts in organic reactions. Friedel–Crafts reaction of 2-alkylfurans with 3-substituted allylic alcohols 125
Gas oil
Deep desulfurization of heavy atmospheric gas oil with Co–Mo–Al catalysts Effect of sulfur adsorption 99
Group V metals
Oxidative coupling of methane over ternary metal oxide catalysts consisting of Groups I, III and V elements in the Periodic Table 135
Heats of adsorption
High surface area α-aluminas II. Adsorption of oxygen, ethylene, carbon dioxide and carbon monoxide on silver dispersed on HSA α-alumina 41
Heavy atmospheric gas oil
Deep desulfurization of heavy atmospheric gas oil with Co–Mo–Al catalysts Effect of sulfur adsorption 99
Hydrodenitrogenation
Silicon–amine intercalated titanates as novel supports for hydrotreating catalyst 111
Hydrodesulfurization
Silicon–amine intercalated titanates as novel supports for hydrotreating catalyst 111
Hydrodesulphurization
Deep desulfurization of heavy atmospheric gas oil with Co–Mo–Al catalysts Effect of sulfur adsorption 99
Hydrogenation
Silicon–amine intercalated titanates as novel supports for hydrotreating catalyst 111
Hydrotreating
Silicon–amine intercalated titanates as novel supports for hydrotreating catalyst 111
Intercalation
Silicon–amine intercalated titanates as novel supports for hydrotreating catalyst 111
Iron–cobalt catalyst
Activity and reduction behavior of fused iron catalysts containing cobalt for ammonia synthesis: a structure study 5
Kinetics
Activity and reduction behavior of fused iron catalysts containing cobalt for ammonia synthesis: a structure study 5
Laser Raman spectroscopy
Raman spectroscopy characterization of molybdena supported on titania–zirconia mixed oxide 151
Layered titanate
Silicon–amine intercalated titanates as novel supports for hydrotreating catalyst 111
Methane oxidation
Investigation of methane oxidation on Pt/Al_2O_3 catalysts under transient reaction conditions 169
Methane oxidative coupling
Oxidative coupling of methane over ternary metal oxide catalysts consisting of Groups I, III and V elements in the Periodic Table 135
Mixed metal oxide catalysts
Oxidative coupling of methane over ternary metal oxide catalysts consisting of Groups I, III and V elements in the Periodic Table 135
Mixed oxide
Silicon–amine intercalated titanates as novel supports for hydrotreating catalyst 111
Mixed oxides
Raman spectroscopy characterization of molybdena supported on titania–zirconia mixed oxide 151
Molybdena
Raman spectroscopy characterization of molybdena supported on titania–zirconia mixed oxide 151
Mössbauer spectroscopy
Activity and reduction behavior of fused iron catalysts containing cobalt for ammonia synthesis: a structure study 5
Nickel–molybdenum catalysts
Silicon–amine intercalated titanates as novel supports for hydrotreating catalyst 111
Organic peroxides decomposition
Decomposition of organic hydroperoxides on cation exchangers Kinetic pathway of *p-tert*-butylcumene hydroperoxide decomposition 33
Oxygen
High surface area α-aluminas II. Adsorption of oxygen, ethylene, carbon dioxide and carbon monoxide on silver dispersed on HSA α-alumina 41
Para selectivity
Effect of extrusion and silylation of ZSM-5 on *para* selectivity of diethylbenzenes 161
Phenol oxidation
Vanadium silicate xerogels in hydrogen peroxide catalyzed oxidations 85
Pillaring
Silicon–amine intercalated titanates as novel supports for hydrotreating catalyst 111

Platinum/alumina catalysts
Investigation of methane oxidation on Pt/Al_2O_3 catalysts under transient reaction conditions 169
Pre-oxidation
Investigation of methane oxidation on Pt/Al_2O_3 catalysts under transient reaction conditions 169
Pre-reduction
Investigation of methane oxidation on Pt/Al_2O_3 catalysts under transient reaction conditions 169
Reduction
Activity and reduction behavior of fused iron catalysts containing cobalt for ammonia synthesis: a structure study 5
Regeneration
Coking, aging and regeneration of zeolites XV. Influence of the composition of HY zeolites on the mode of formation of coke from propene at 450°C 21
Silica
Silicon–amine intercalated titanates as novel supports for hydrotreating catalyst 111
Silver
High surface area α-aluminas II. Adsorption of oxygen, ethylene, carbon dioxide and carbon monoxide on silver dispersed on HSA α-alumina 41
High surface area α-aluminas III. Oxidation of ethylene, ethylene oxide, and acetaldehyde over silver dispersed on high surface area α-alumina 61
Silylation
Effect of extrusion and silylation of ZSM-5 on *para* selectivity of diethylbenzenes 161
Solid/solid wetting
Raman spectroscopy characterization of molybdena supported on titania–zirconia mixed oxide 151
Sulphur adsorption
Deep desulfurization of heavy atmospheric gas oil with Co–Mo–Al catalysts Effect of sulfur adsorption 99
Surface area
Relationship between the copper surface area and the activity of $CuO/ZnO/Al_2O_3$ water–gas shift catalysts L1
Temperature-programmed desorption
Oxidative coupling of methane over ternary metal oxide catalysts consisting of Groups I, III and V elements in the Periodic Table 135
Titanate
Silicon–amine intercalated titanates as novel supports for hydrotreating catalyst 111
Titania
Raman spectroscopy characterization of molybdena supported on titania–zirconia mixed oxide 151
Transient studies
Investigation of methane oxidation on Pt/Al_2O_3 catalysts under transient reaction conditions 169
Trickle bed
Deep desulfurization of heavy atmospheric gas oil with Co–Mo–Al catalysts Effect of sulfur adsorption 99
Vanadium/silicate
Vanadium silicate xerogels in hydrogen peroxide catalyzed oxidations 85
Water–gas shift
Relationship between the copper surface area and the activity of $CuO/ZnO/Al_2O_3$ water–gas shift catalysts L1
Zeolites
Coking, aging and regeneration of zeolites XV. Influence of the composition of HY zeolites on the mode of formation of coke from propene at 450°C 21
Acid zeolites as catalysts in organic reactions. Friedel–Crafts reaction of 2-alkylfurans with 3-substituted allylic alcohols 125
Effect of extrusion and silylation of ZSM-5 on *para* selectivity of diethylbenzenes 161
Zirconia
Raman spectroscopy characterization of molybdena supported on titania–zirconia mixed oxide 151
ZSM-5
Acid zeolites as catalysts in organic reactions. Friedel–Crafts reaction of 2-alkylfurans with 3-substituted allylic alcohols 125
Effect of extrusion and silylation of ZSM-5 on *para* selectivity of diethylbenzenes 161
